

COMMONWEALTH OF MASSACHUSETTS  
DEPARTMENT OF TELECOMMUNICATIONS AND ENERGY

THE FIRST SET OF DOCUMENT AND INFORMATION REQUESTS OF THE  
DEPARTMENT OF TELECOMMUNICATIONS AND ENERGY

D.T.E. 05-35

Respondent: Theodore Poe, Jr.

Date: August 23, 2005

Information Request D.T.E. 1-3

- Q. Please refer to section three on page two of the Petition. Be specific as to “a need for additional citygate deliverability”. Was the need for additional city gate deliverability for all city gates or just certain city gates? List the specific locations and specific quantities needed.
- A. Please refer to the attached tables wherein Schedule TEP-2 is updated to list the firm sendout requirements and the additional citygate deliverability requirements (“Other Purchased Resources”) by service territory for the Company. These tables show a need for peak day deliverability in the Essex and Cape service territories beginning in 2005/06, and in the Boston service territory beginning in 2006/07. Additionally, all four of the Company’s Massachusetts service territories show a need for incremental deliverability during the design heating season beginning in 2005/06.
